

FAQ's

What is ARC?

Accounts Receivable Conversion is a remote deposit service designed for businesses who receive checks through the mail, message or drop-box environment with the ability to convert checks into electronic transactions at your desk.

What do I need, to get started?

A computer with internet access and a scanner.

How do I select the right scanner?

That depends primarily on the volume of checks you receive at your place of business. We provide low to high capacity scanners capable of processing a single check to thousands of checks per day.

What types of checks can I process?

Any type of domestic check, money order, travelers check, or official check with a MICR line.

Do I still need to go to the bank to make a deposit?

You can reduce visits by depositing checks at your place of business.

Faster access to cash and fewer trips to the bank.

You should know your bank - but you can certainly cut down on your visits. We know that you need to work as efficiently as possible, and driving to the bank to make deposits can get very expensive and just isn't a productive use of time.

That's why we recommend our Remote Deposit Capture Module Accounts Receivable Conversion to deposit checks conveniently at your place of business. It's easy, secure and efficient.
