

FAQ's

What is FAXTellerPLUS?

FAXTellerPLUS is a new way for businesses to participate in remote deposit capture by using a standard fax machine with absolutely no hardware equipment or software to purchase or download.

Does FAXTellerPLUS handle low check volume?

FAXTellerPLUS was specifically designed for businesses with very low check volume, preferably less than 30 checks per day.

How does FAXTellerPLUS work?

Place up to three checks inside your specially designed check carrier and fax both the front and back of the checks. The digitized image of the check is processed and you will receive a daily confirmation by fax.

What do I need to get started?

All you need is a fax machine! NSFdeposit will provide you with our dedicated fax number and specially designed check carriers.

What if I already have a digital check scanner in place?

FAXTellerPLUS can be used in conjunction with scanners, lockbox and with recurring payments. These methods are not exclusive of one another and can be used together to provide a complete check processing package.

Faster access to cash and fewer trips to the bank.

At NSFdeposit we know that you need to work as efficiently as possible. Driving to the bank to make deposits can get very expensive and just isn't a productive use of time. That's why we recommend our new cost savings service FAXTellerPLUS to deposit checks conveniently at your place of business. It's easy, secure and efficient.

FAXTellerPLUS®

a new way to make deposits
and improve cash flow.

You can continue to accept your customers' check payments as usual. Just change the way you deposit your checks. NSFdeposit's FAXTellerPLUS™ is a new way for businesses to participate in Remote Deposit Capture. A standard fax machine allows you to deposit checks electronically from your office directly to your depository bank - no special equipment or software to purchase.

FAXTellerPLUS is ideal for businesses of every size, type and with multiple locations that receive low check volume (30 checks per day or less). Businesses that do not have access to the internet, want to eliminate the need for a PC or do not want to have to perform the functions associated with more traditional Remote Deposit Capture systems will find that FAXTellerPLUS is economical and easy to use.

It's simple! No trips to the bank, no deposit slips, no courier service for your daily deposits.

Place up to three checks inside the specially encoded check carriers, then fax the front and back of the checks to NSFdeposit's dedicated fax number. Upon successful transmission, digitized images of the checks are processed.

Ease and convenience.
No equipment to purchase.
Reduce bank fees and visits.

You receive a confirmation by fax, e-mail or both with your deposit total.

Just Fax!

No Equipment
All you need is a fax machine, check carriers and our dedicated fax number.
