

## POINT OF SALE simplify check acceptance

EFT Network's Point-of-Sale (POS) solution is designed for Retail Owners to accept consumer checks at the point-of-sale and then easily convert them into electronic transactions. Together with EFT Network's web based system and easy to use POS equipment, you can begin to streamline your check acceptance process.

Our web based system provides everything from ACH processing, image capture to detailed online reporting. We give you full control to view your transactions via our secure web site. Best of all, our system immediately alerts you of NSF checks to give you the advantage to identify bad check writers instantly, while reducing the fees associated with NSF items. We also provide high quality stored check images which will help reduce paperwork, eliminate trips to the bank and consolidate account management for multiple locations. With EFT Network, you will find that our POS solution is superior and best suited for your business needs.

### Key Features

- Submit checks and transfer funds electronically
- 24/7 access to retrieve check images and authorization via our secure web site
- Real-time verification database reduces risk of accepting bad checks and collection costs
- Support multiple interfaces for POS applications
- Checks received through any remote or branch office/store locations can be deposited through one banking institution/account, simplifying bank reconciliation processes

### Benefits

- Process consumer checks electronically
- Easy-to-use web based system
- Reduce Bank transaction fees
- Online reporting tools and permanent check images available
- Recover your returned items as quickly and cost effectively as possible

# POINT OF SALE

1 A consumer presents a completed check to the Merchant, who scans the check using a check scanner to capture the check image and data.

---

2 Check information is transmitted through EFT Network's processing system.

---

3 A receipt is printed for the consumer to sign, authorizing the debit.

---

4 Funds are processed through the ACH and electronically debited from the consumers account and available in your bank account within 24 to 48 hours.

## POS Technology

EFT Network supports multiple interfaces for Point of Sale.
